

## Executive Profile

### Alyson Smith

Alyson Smith is an accomplished health care professional with over 18 years of operational management experience in serving public and private organizations in the healthcare and technology fields. Alyson has a deep understanding of health information technology and has utilized this experience to improve operational efficiencies and health quality outcomes by supporting programs such as Meaningful Use, MIPS and MACRA.

Mrs. Smith has a demonstrated history of project management and has supported large scale implementation projects at a local, state and federal level. Her knowledge of FQHC's, Medi-Cal and commercial payors has been critical to her work. She strongly believes in a people focused approach which has led to becoming a trusted advisor on numerous payor contracting efforts across the country.

Through her work supporting several health care initiatives, Alyson has become a data expert. Her experience with quality reporting has helped to advance care and increase revenue through analysis and data management.

Alyson holds a Master of Public Administration degree and a Bachelor of Science degree in Health Science with a concentration in administration, both from California State University of San Bernardino. Her experience with public policy and healthcare has served as an impressive vehicle to lend data driven reporting to a number of health focused initiatives across the country.

Alyson Smith has had a positive impact with her previous engagements because she believes in the advancement of the organization by prioritizing their individual needs. She believes in a collaborative effort and approaches each engagement as an opportunity to advance the goals and individuals of an organization with her experience and leadership.
